

DUAL VIDEO CAMERA

Tool overview

This borehole camera offers a twin view set up allowing the operator to switch between either a forward or side view camera. The side view camera has an infinite 360° rotation along with view orientation. The survey is recorded onto both USB memory stick and computer hard drive - the USB memory stick is available at the end of the survey for the client to take away.

Measures: 1400 x 65mm

Forward and side view camera options

Features and benefits

- Works on wireline cable and camera runs on geophysical winch
- Ideal for well inspection
- Real time high quality video
- High and low intensity lighting

Operational Conditions	Logging Conditions
Minimum diameter 100mm	2-5 m/min
Dry or clear water filled	

Specifications	
Size	1400 x 65mm
Weight	10kg
Max. Temperature	70°C
Max. pressure	200bar

Why European Geophysical Services?

European Geophysical Services offers excellent and reliable field service coupled with many years of geophysical interpretation experience, efficient data processing and high-quality reporting. All our field operators are graduate geologists or geophysicists with data acquisition and interpretational experience able to give on site analysis and interpretations. For more information, please call 01939 210710.
